

**Are you looking for a course designed exclusively for OMS practices to keep you current on updates and changes in the insurance industry?**

*If you answered YES, then you are not alone and this webinar series is for you!*

## **Untangling the Web of Oral and Maxillofacial Surgery**

### **Billing:**

This webinar series will draw on Terri's 30+ years of experience with medical/dental cross coding and billing for OMS Practices. Recorded sessions will cover the correct coding principles and guidelines for diagnostic and procedure coding seen most often in OMS practices. This includes coding for grafting and implants, oral pathology, trauma, orthognathic, radiology and anesthesia. We will walk through scenarios on all of these topics, when and how to use modifiers appropriately and when to use a dental code versus a medical code. We'll also examine updates on E&M coding changes that impact your practice.

**This webinar series consists of 5 recorded sessions, each 90-minutes long:**

- Session 1 – ICD-10 codes and documentation requirements, etc.
- Session 2 – Updated guidelines on the E&M Codes and CPT Modifiers
- Session 3 – Coding for Trauma and Radiology including CBCT and CDT updates
- Session 4 – Bone Grafts, Implants and Oral Pathology
- Session 5 – Coding for Anesthesia, Orthognathic, TMJ and Medicare

### **Fee for the webinar series:**

- **Access to the recording links for the 5 webinars AND applicable handouts: \$399.00 per office.**
- **Access to *only* the recording links for the 5 webinars: \$299.00 per office.**

### **Payment Options**
